

Shreya R

Student

I am a Computer Science undergraduate at the National Institute of Engineering, Mysore, with a deep passion for technology, particularly in web development. Currently, I am honing my skills by building projects that encompass both front-end and back-end development. Actively enhancing my skills in Data Structures and Algorithms to optimize solutions and tackle complex computational challenges. Passionate about leveraging technology to create scalable and efficient applications.

Educational :

The National institute of Engineering 2022-2026

Bachelors of Engineering (B.E) in computer Science , NIE

Mysore , Karnataka

CGPA : 8.8

ALAVA ' S 2020-2022

PCMB - Pre-University Education , Karnataka

marks: **93.6%**

Technical Skills

- Front end Development
- Back-End Development:
- Database Management:
- API Integration:
- Computer fundamentals :
OS | DBMS | OOP's | CN
- Programming Language:
c | c++ | java | Python

Project

Job Application Tracker

- Developed a full-stack web app with Node.js, Express, EJS, and MongoDB for job application tracking.
- Created RESTful APIs for CRUD operations, allowing seamless data management.
- Used MongoDB for secure, scalable data storage.
- Designed a dynamic, responsive user interface with EJS templates for enhanced user experience.
- Integrated front-end and back-end components for a fully functional application.

Real-Time Chat Application :

- Developed a basic real-time chat application using JavaScript, and Socket.io for instant messaging.
- Utilized Socket.io for real-time communication, achieving message delivery under 1 second.
- Created a responsive front-end interface with HTML and CSS for desktop and mobile compatibility.
- Used Node.js and Express.js for efficient server-side logic, managing multiple concurrent users.

Timetable Creation Application

- Created a web-based timetable tool to automate class scheduling, preventing overlaps and optimizing resource use.
- Developed a RESTful API with Flask and Express.js, utilizing MongoDB for data management.
- Designed a user-friendly interface for managing teachers, subjects, and viewing timetables
- Achieved an 80% reduction in manual scheduling effort and enhanced timetable accuracy.
- Technologies used: Flask, Express.js, MongoDB, EJS, HTML, CSS, JavaScript.
